

Ring gauge and cigar ruler

Sheet 1 of 2: reference circles and rulers. Plain paper is fine.

PRINT AT 100% (ACTUAL SIZE). TURN OFF "FIT TO PAGE".

Then measure both squares with a real ruler. If either one is off, the sheet was scaled.

1 inch

2 cm

How to use it

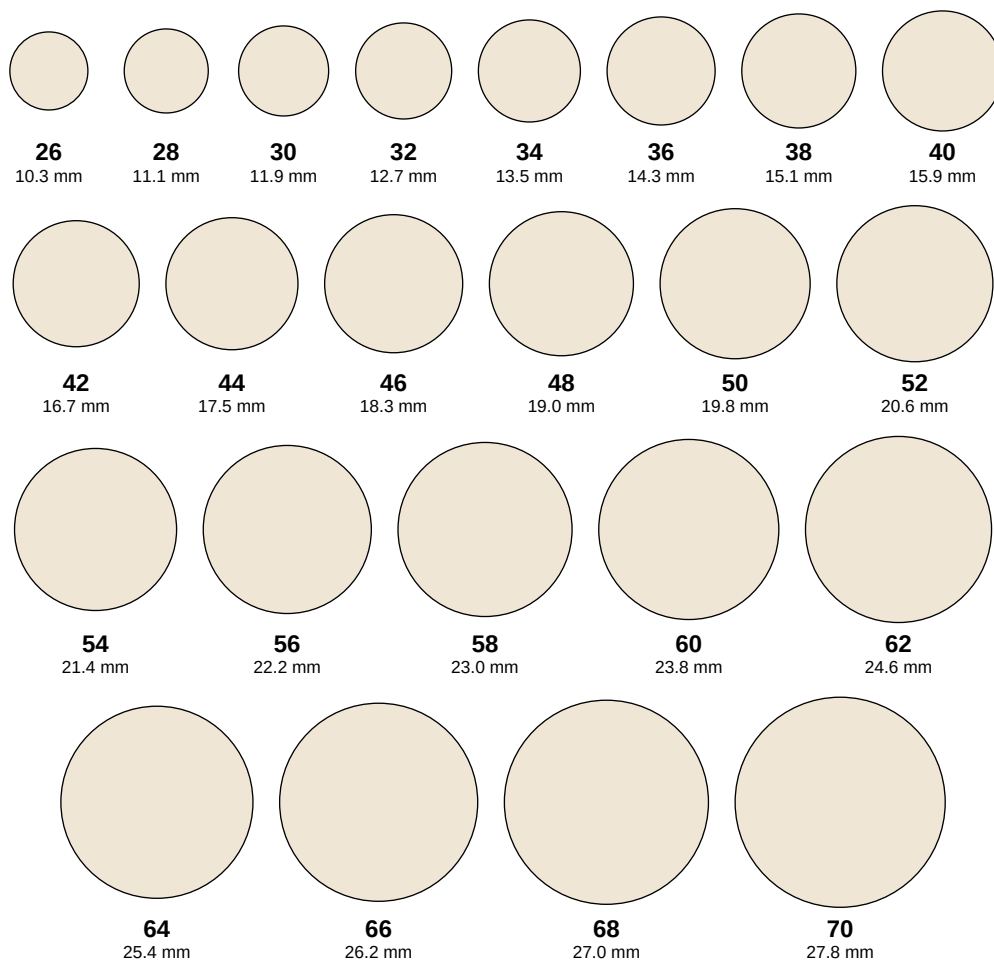

Stand the cigar on its foot over a circle.

The circle that matches the widest part is its ring gauge.

Lay the cigar along a ruler for its length.

1 ring = 1/64 inch of diameter.

Ring gauge circles, 26 to 70 (ring, then diameter in mm)

Cut-out ring gauge card

Sheet 2 of 2. Print on card stock for a gauge that holds its shape.

PRINT AT 100% (ACTUAL SIZE). TURN OFF "FIT TO PAGE".

Then measure both squares with a real ruler. If either one is off, the sheet was scaled.

1 inch

2 cm

Making and using the card

Cut the card out on the solid line.

Cut each hole on its dashed line with a craft knife.

Slide the cigar's foot into the holes, small to large.

The first hole it passes without squeezing is its ring.

Hand-rolled cigars vary, so a ring either way is normal.
